Summaries — English, French, and German ........................ xi
Preface — by David Miles .......................................... xiii

Section 1 The scope and importance of Continental Shelf prehistory
1. The wider significance of submerged archaeological sites and their relevance to world prehistory  by Geoff Bailey ........................................... 3
2. The prehistory of the North Sea floor in the context of Continental Shelf archaeology from the Mediterranean to Nova Zemlya  by N C Hamming ........................................ 11

Section 2 Submerged prehistoric archaeological surveys
3. Submerged Stone Age — Danish examples and North Sea potential  by Anders Fischer ........ 21
4. The inundated landscapes of the western Solent  by Gerry Maberly .............................. 37
5. The North Sea project: the first palaeontological, palynological, and archaeological results  by Jan Glimmervoj, Dick Moë, Klaas Post, Felle W F Reumer, Hans van der Plicht, John de Vos, Bas van Geel, Guido van Keeken, and Jan Peter Pals ............. 43
6. Submerged Stone Age coastal zones in Denmark: investigation strategies and results  by Ole Grom and Jørgen Skaarup .................................................. 53
7. The implications of prehistoric finds on and off the Dutch coast  by Leo Verhart .............. 57

Section 3 Systematics, palaeontology, and proxy data
8. Investigating ‘Doggerland’ through analogy: the example of Holderness, East Yorkshire (UK)  by Henry P Chapman and Malcolm C Little ........................................... 65
9. Palaeoceanological heritage from the bottom of the North Sea  by T van Kolfschoten and H van Essen .................................................. 70
10. Biological proxy indicators in buried and submerged site prospection: what is significant?  by Peter Murphy .................................................. 81

Section 4 Management and supporting data
11. Prehistory in the North Sea: questions from development-led archaeology  by Antony Firth ........... 89
12. Constructive conservation in England’s waters  by Ian Oxtoby ........................................ 93
13. Existing resources of acoustic and sedimentary sample data for analysing the landscape for human occupation in the North Sea  by D Long, C Graham, and A Stevenson .................................. 99
14. Can we manage?  by Th Humphreys and Hans Peters ........................................ 102

Summary of discussions and drafting groups .................................................. 113
Conclusions and recommendations .................................................. 118

Bibliography .......................................................... 121

Index  by Peter Rees .................................................. 137
